Experience

Whirlpool / Software Engineer

From 2014 working in the Electronic Department

- Responsible for an internal strategic Tool that allows to configure and personalize appliance software
- Requirements analysis and project scheduling
- Define processes and tools best suited to each need, working Customer oriented for the common Mission
- Responsible for defining the best practices and the best processes among different appliance electronic organizations within the company; Responsible for leading the standardization of processes, taking the Best of Best and defining standards.
- Company Ambassador : Responsible for creating a positive and productive work environment
- Plus : Active member of the Engagement Team, organizing Team Building activities to keep people engaged & committed

I created the Cross Team Synergy value my best accomplishment

We have different electronic departments in the same company, one for each type of product line. Since they are autonomous, each of them was working with no visibility or interest in how other parallel departments were doing. They did things differently, and often a problem in a department was happening in others too. They were struggling on the same issues, they were replicating the same job and the company was wasting resources. ,

I started to collect information and put people to work together, having them able to share their processes and best practices, their daily work, their issues and achievements to other departments.",

I have been able to put all the departments working together as they realized the value of working as a **Team of Teams**. Departments still work autonomously and each of them have their own responsibility, but now they can count on others ! It's been approximately 4 years since our very first meeting and we still meet once a month to grow together.

Indesit / Software Engineer 1999-2014

Software Engineer in Indesit spa, started as a software developer and Project Manager later, working from Concept through Delivery in the 'Research & Innovation' department

- Worked cross-functionally in collecting data, analyzing scenarios and patterns, defining requirements and developing algorithms\applications in the field of Preventive Maintenance and Early Fault Discovery
- Worked cross-functionally in collecting data, analyzing scenarios and patterns, defining requirements and developing algorithms\applications for IoT
- Designs, programs, codes, develops, tests, documents, build/install, debugs, and performs analysis on software
- Requirements analysis and project scheduling
- Responsible for many 'Fields Tests' projects
- Responsible for HW and SW Suppliers engagement
- Responsible for European Funded projects
- Responsible for End-of-Line test applications in Factories

The Field Test of our new smart 'cube' in 50 united-states customers my best accomplishment

Technicians do not know which is the broken part of an appliance when they are called by customers, so they have to go back a second time bringing materials. This is a waste of energy.

We built a prototype called 'cube' to connect to each and every model of appliance to collect data from machines and, using a smart algorithm data analyzer, to be able to understand which part of an appliance was broken and even predict faults. As the final phase of the project, we built the 'cube' that was installed in 50 American houses.

I was responsible for the 'Field test' in all the phases, from recruiting customers, assurance and privacy papers, installation phase, the field test itself, customer assistance, collection and analysis of data. The Field test project gave my company a huge visibility to the actual multinational american company that was working with us and different other projects were started after this.

Reale Mutua Ass.ni spa/ Director Assistant 1999

Director Assistant and accountant

My first work experience, a small family-run office. I learned a lot working in contact with the public, becoming very thorough and meticulous from the very beginning ! Precision and quality of the work and right time. After 20 years I still put in place what I've learned there in my today daily work.

Patents

2005 - Inventor of European Patent No. 05425500.5-

Strengths

Open Minded

Proactive

Loyable and Reliable

What I am looking for

A dynamic environment that meets the values I believe in the most:

TeamWorking & Play to WIN with Integrity & Respect

Where and how in years from now ?

Something I often think about. It scares me a little cos I'll still be struggling with project timing and deliveries screaming at keyboards and screens 😅

What I am sure of is that I will continue to put in all the effort to be the best version of myself, to keep being a successful and happy woman. And I will be doing this with people that believe in me and give me the opportunity to grow and do great things together

Personal information

Born July, 1979, married, 3 childrens and a dog

Available to travel occasionally

My time is for family, dog too, MuayThai and Surf
Life philosophy "**Buenas Vibras**"

Most recent Awards and Achievements

2020 - from Tools department Manager: **Above and Beyond** - keep the 'spirit of Winning'

Recognition program in Emea

EES Fabriano Team

Dear Irene Orienti,

Congratulations and Thank You!

Everyday you make decisions at work that impact our customers and our company. This reward is recognition that your efforts and your decisions made a difference. You go above and beyond your normal work and we noticed!

We sincerely appreciate your contributions and enthusiasm. Employees like you keep the "spirit of winning" alive at Whirlpool!

2020 - From Washing Machine, electronic board department Manager **Play to Win**

Irene demonstrated to **Play to Win** since she is strongly supporting the Setting File team to improve editor and processes. Irene is impacting indirect improvement on Product Quality through her behavior and positive result on this

2019 - Recognized from my supervisor as **someone who has inspired extraordinary performance in others at Whirlpool.**

Congratulations!

You have been recognized by your colleagues during the 2018 Employee Engagement Survey as someone who has inspired **extraordinary performance** in others at Whirlpool.

Seemingly small actions can make a huge difference for our company – not only in the marketplace, but also on our teams. Your role in establishing an environment of teamwork, inclusion and continuous improvement help us maintain a **winning culture** where employees live our values and routinely go above and beyond to help us succeed.

When **great people** at Whirlpool work together to own and drive collective outcomes, we create a company culture that is highly effective and able to deliver results well beyond expectations.

Thank you for all that you are doing to create a positive and productive work environment where everyone is enabled to achieve their full potential. A certificate recognizing your contribution has been made available as an attachment to this email. We encourage you to share the **recognition** you've received from colleague(s) with your manager.

Congratulations, Irene Orienti, on being recognized by your coworker(s) during the 2018 Employee Engagement Survey.

In every strategy there is a variable that has the most significant impact on the outcome, **an x-factor**.

At Whirlpool, the x-factor is YOU – because you have exemplified People Excellence.

People Excellence **unleashes individual and collective talents, inspires a winning culture and creates competitive advantage that delivers results well beyond expectations.**

Here's what your coworker(s) shared about you:

- Ho conosciuto Irene solo pochi mesi fa ma ho potuto instaurare rapidamente una collaborazione attiva e funzionale che ha permesso di risolvere in breve tempo i problemi che inizialmente si manifestavano in GESE e che oggi, grazie al suo lavoro, non si presentano più. Le richieste che le vengono inoltrate vengono tutte tenute in considerazione e processate in funzione del tempo

che ha per poterci lavorare ma non accade mai che una mail o un messaggio Hangout rimanga senza risposta. Infine è una persona estremamente positiva e questo è un atteggiamento importante specialmente in un periodo come quello che stiamo vivendo in cui il pessimismo tra i colleghi è piuttosto diffuso. Grazie.
